Lamb is seasonally available from Hawk Hill. Lambs are born in late April to mid May and will be available when they reach a live weight of approximately 80-90 lbs. Lambs are left on their dams until shipped so they are raised on milk, grass and locally produced grain.

Lamb is available as a whole or half, cut and wrapped to the client's specifications. The cost is \$6.50 per pound hanging weight (ie before cutting and wrapping). The lambs average about \$300 each (approximately 45 lbs hanging weight). If the client prefers to do their own butchering, the price will be reduced by the cut and wrap costs. Any extra costs due to specialty cutting or wrapping will be in addition to the base price.

Cutting instructions must be provided before the animals are shipped to slaughter.

A deposit is required for specialty orders.

Arrangements can be made for heavier or lighter lambs with the price adjusted accordingly.
